# October 2021 Climate Summary for West Central and Southwest Florida

For much of October 2021 it was rather warm and humid with the cool down not occurring until the last few days of the month. Temperatures ended up averaging near normal to over 3 degrees above normal with many of the official climate locations across West Central and Southwest Florida ending up in the Top Ten Warmest Octobers.

Rainfall in October 2021 was variable with some areas here and there seeing above normal amounts, while most areas though were below normal. However, these below normal amounts are not as significant in October compared to the summer months since the average rainfall for the month is only about 2.00 to 3.50 inches across the area.
